

FINAFLEX[®]

1-ANDRO

THIS STUFF IS NO JOKE...

Supplement Facts

Serving Size: 1 Capsule
Servings per Container: 60

| Amount Per Serving | % Daily Value |
|---|-----------------|
| FINAFLEX 1-ANDRO | 160mg ** |
| 3-hydroxy-5alpha-androst-1-en-17-one..... | 110mg ** |
| Bergamottin (6,7,-dihydroxybergamottin)(DHB)..... | 50mg ** |

** Daily Value not Established
Other Ingredients: Gelatin, Silica, Magnesium Stearate, Stearic Acid

Suggested Use: As a dietary supplement take 2-4 capsules daily. For Extreme results use 2 bottles of FINAFLEX 1-Andro consecutively over a 40-60 day period. Do not use FINAFLEX 1-Andro for more than 60 days consecutively. Take at least 60 days off before starting another cycle of FINAFLEX 1-Andro. Follow cycle of FINAFLEX 1-Andro with PCT REVOLUTION by Redefine Nutrition to ensure proper post cycle therapy.

FINAFLEX 1-ANDRO is the most pivotal advancement in lean muscle acquisition ever introduced. **FINAFLEX 1-ANDRO** brings to market the most sought after and exotic legal bodybuilding ingredient available today. Combining **FINAFLEX 1-ANDRO** with an anabolic amplifier [DHB] makes the active ingredient more bio-available, creating an extreme anabolic environment in the body*

FINAFLEX 1-ANDRO: This stuff is no joke

January 2005 was a sad month. It was that month when the supplement industry witnessed the death of the best natural legal hormonal products ever produced. I am talking about the 1-test / 1-AD family of supplements. They were legendary and now they were illegal. These “delta-ones” (as they were referred to) changed the entire legal hormone market. There was nothing like them before their introduction and there has been nothing like them since. “Delta-ones” included the original 1-AD’s (1-androstenedione and 1-androstenediol) and the 1-test esters and ethers.

All the “delta-ones” worked pretty much the same way. 1-androstenedione, 1-androstenediol, and 1-testosterone each gave comparable results at equivalent dosages. They converted very well and were potent. Gains in body weight and strength were mind blowing and came on fast!

Now before you start tearing up in sentimental nostalgia there is something I have to tell you...there is still a 1-test precursor left uncontrolled by Uncle Sam! That’s right. Uncle Sam got three of them but he failed to regard the fourth compound that rounds out the delta-one primary metabolic conversion loop.

See the compound on the left? That’s the forgotten “delta-one” I am talking about...1-androsterone.

I am sure you are impressed but you are probably wondering, “Now just how effective is 1-androsterone compared to the other three compounds?”

I am not kidding when I tell you that milligram per milligram 1-androsterone competes with all three other “delta-one” direct precursors.

Yes, 1-androsterone is a two-step precursor and generally speaking two step precursors are substantially inferior to one step precursors. However it’s different with “delta-ones”. Their unique chemical structure makes them much less susceptible to the phase II metabolism (conjugation of 3-hydroxyl group) that normally eats up other 2-step precursors such as DHEA.

So the vast majority of administered 1-androsterone has but two places to go...either to 1-androstenediol or 1-androstenedione. And we know that both of these precursors are proven kick-ass!

FINAFLEX 1-ANDRO is the name

So yeah, thanks to the unique pharmacokinetics of the “delta-ones”, and the oversight of government administrators, the spirit of 1-AD lives another day with FINAFLEX 1-ANDRO. FINAFLEX 1-ANDRO provides a full serving of 1-androsterone - plus a little extra per cap...a real dose for real results. Combine the 1-androsterone with Bergamottin (a pharmaceutical grade anabolic amplifier) and you have yourself an incredibly potent and more readily absorbable product...FINAFLEX 1-ANDRO.

How do you cycle FINAFLEX 1-ANDRO?

FINAFLEX 1-ANDRO should be taken just like the old 1-AD was. Users can see gains anywhere from one to six caps a day, but three caps is the usual dose for most guys. Cycles last from 2-6 weeks and should be followed by PCT.
